# Portal Co-existence and Migration (C&M)

## Business Perspective

### ■ Problem Statement

- Envision, plan, build, deploy and manage a new SharePoint portal platform solution that runs in parallel with the existing portal environment until the final migration is complete and the old portal environment turned off

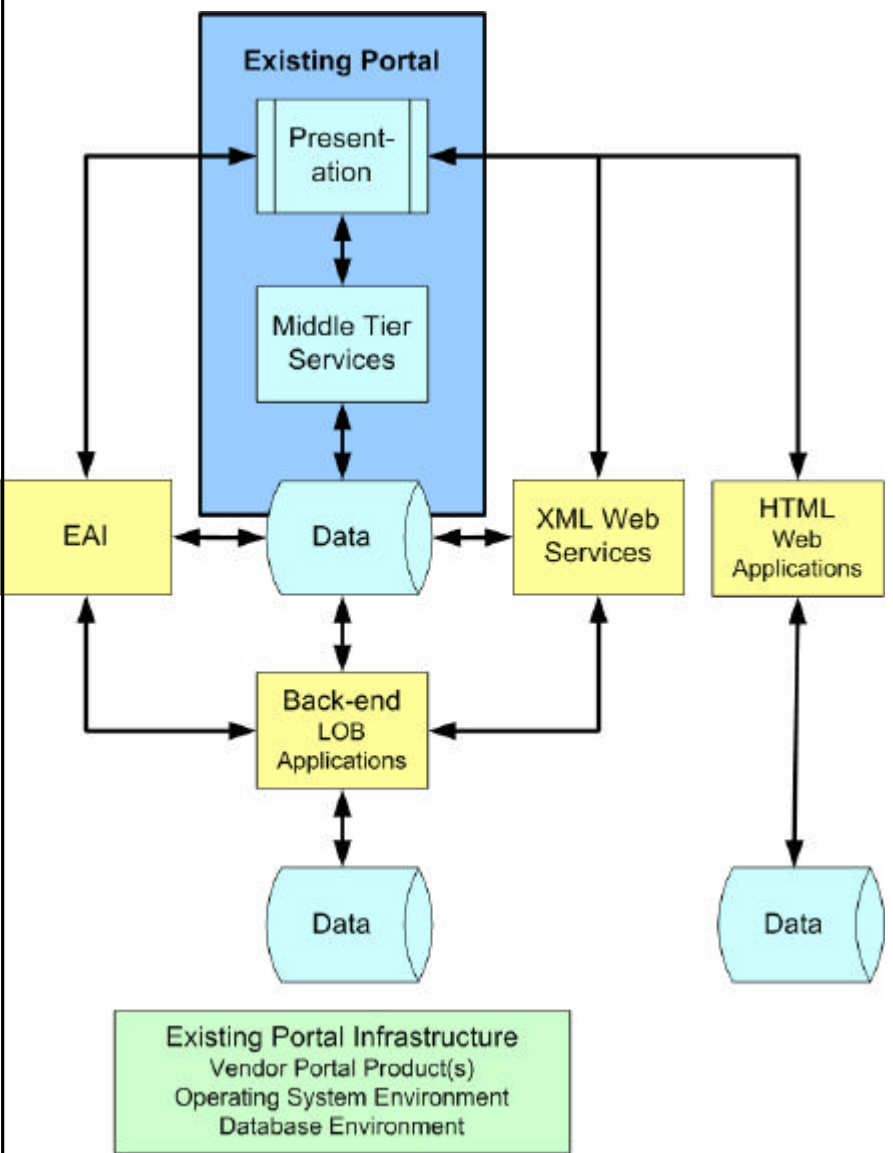

### ■ Solution

- Multi-phased, iterative portal C&M process framework
  - Pilot migration (and synchronization/co-existence)
  - Incremental migrations
  - Final migration

# Portal Co-existence and Migration Process Process Framework

- **C&M Process consists of:**
  - Four Core **Tasks**
    - Per-Task **Activities** (based on MSF)
      - **Steps** to be completed for each Activity
- **Four Core Tasks driven by the Four Core Perspectives**
  - Portal infrastructure
  - Presentation layers
  - Middle tier portal services
  - Portal content and data sources

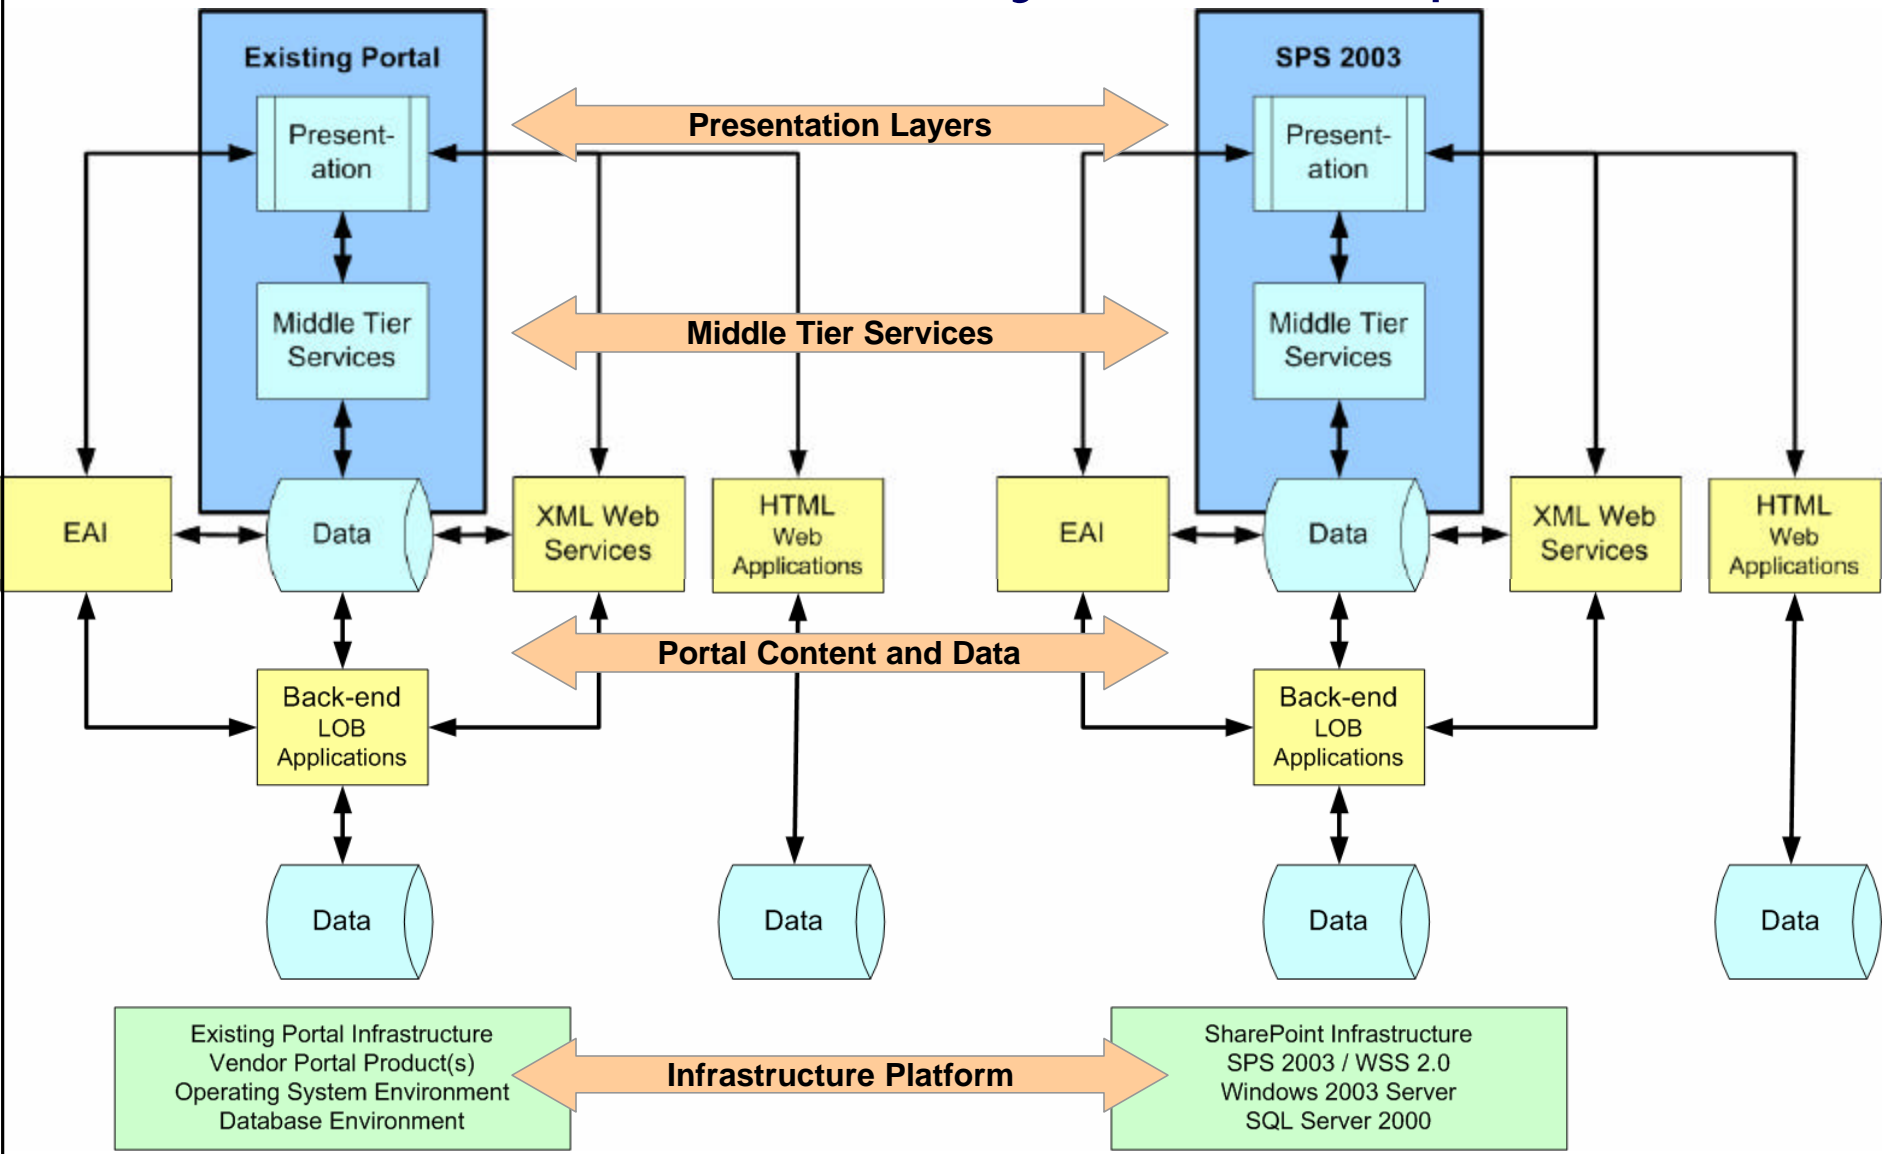

# PresPart Portal Reference Architecture

## Four Core Perspectives

- Presentation Layers
- Middle Tier Portal Services
- Portal Content and Data sources
- Portal Infrastructure

# Core Tasks driven by Core Perspectives

# Portal Co-existence and Migration Process Process Framework

- **Iterative executions of the portal C&M migration process**
  - Pilot migration (and synchronization/co-existence)
  - Incremental migrations
  - Final migration
- **Each process execution scoped based on the Four Core Perspectives**
  - Portal infrastructure (I)
  - Presentation layers (P)
  - Middle tier portal services (S)
  - Portal content and data sources (C)

# Portal Co-existence & Migration Process

## Four Core Perspectives, Tasks and Deliverables

### ■ Portal Infrastructure

- Database, Operating System Services, Portal Products

### ■ Presentation Layers

- Branding, UI, Gadgets, Portlets, Web Parts, ...

### ■ Portal Content and Data sources

- LOB applications, Enterprise Application Integration (EAI), Sites, Information architecture, Access controls, Document and other portal content, ...

### ■ Middle-Tier Portal Services

- Search, Notification, Audience Targeting, User Profiles, Team/Community Sites, Personal Sites, ...

# Portal Co-existence & Migration Process

## Task Activities

- **Microsoft Solution Framework (MSF) based Activities**
  - Envisioning, Plan, Build, Release and Manage
  - Process-wide Activities
    - Envisioning – business and functional requirements, scope and strategy
  - Per-Task Activities
    - Plan – detailed analysis, architecture and design
    - Build
  - Process-wide Activities
    - Release
    - Manage

# Perspectives Layered Model

## Portal Migration Framework

### ■ Presentation Layers

- Vendor specific (e.g. gadgets, portlets, Web parts)
- LOB / Third-Party Applications
- In-house Developed

### ■ Middle Tier Services

- Vendor specific (e.g. Search, User Profiles)
- LOB / Third-Party Applications
- In-house Developed

### ■ Portal Content and Data sources

- Vendor specific (e.g. portal configuration, portal data)
- LOB / Third-Party Applications
- In-house Developed
- Documents and other portal content

# Parallelspace PresPart™

## Portal Migration Framework

- **Parallelspace PresPart™ Portal Co-existence and Migration Framework**
  - Solution framework for scoping, planning and executing version-to-version and portal-to-portal co-existence and migration projects
  - PresPart ESP™
    - Three-dimensional complexity-based Web Part classification model
  - Migration effort and cost budgeting tools
- **Help your customers scope their SharePoint 2003 version-to-version and competitive migration and co-existence projects**
  - Educate, inventory, analyze, estimate and present

# Parallelspace Corporation

Information Worker Solutions

- **Complete supplier of collaborative business solutions and services**
  - SharePoint architecture, design and deployment
  - Knowledge architecture and implementation
  - Parallelspace ACMS (Accelerated Content Migration Service)
  - Enterprise business collaboration solutions for connecting people with their fellow employees, suppliers, partners and customers
- **Microsoft Certified Solutions and Consulting Partner**
  - Microsoft Office SharePoint Portal Server 2003
  - Windows SharePoint Services
  - Live Communications Server 2005
  - Consultant to SharePoint Portal Server product group and Microsoft IT
