

Parallelspace Professional Services

Accelerated Content Migration Services (ACMS)

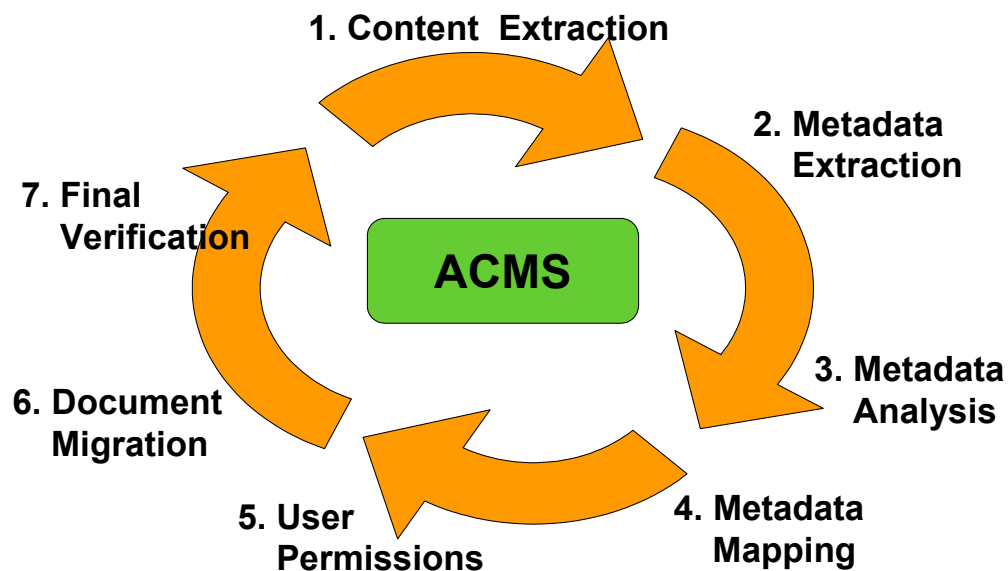

for Microsoft SharePoint Portal Server

Overview

Parallelspace Corporation's Accelerated Content Migration Services for SharePoint Portal Server is a unique offering that enables customers to rapidly migrate documents from file servers, database applications and document management systems such as Xerox DocuShare servers into SharePoint Portal Server. Accelerated Content Migration Services uses a proven, repeatable process and tool set to migrate all of the information including access permissions and descriptive metadata in addition to the documents themselves.

Parallelspace Corporation creates solutions that help solve corporation's needs for knowledge sharing, business collaboration and digital meetings.

Today, every business relies on closer relationships with its customers, partners and suppliers. Efficient and effective cross-organizational collaboration has become an essential requirement of any business and technology infrastructure, whether the business imperative is speeding decisions, reducing time-to-market, or leveraging expertise and institutional knowledge.
